To Accountants considering Calxa Software:

We have just completed the implementation of the Calxa software with the assistance of Russell from Equilibrium Management Services Ltd. The whole process was done over five sessions and it has been totally pain-free. The success of the implementation is due to Russell being very understanding and supportive in working with me to make sure that I'm well trained and confident in using this software. Because of his practical experience in using Calxa, he was able to give us practical tips and guides with the result that we've been able to integrate Calxa and our monthly reporting processes without delay.

Initially, I contacted Russell because I needed a software package to help me to prepare budgets for our organisation – spreadsheets were taking up too much time. Russell come over to my office to do a demo of the product, assured me that it integrates with QuickBooks and I was finally convinced when Russell showed me how he uses Calxa to help with not only budgeting but also his monthly reporting requirements.

I have been using Calxa for 2 months now and I am thoroughly impressed with the functionality of the product. Most valuable to me is its seamless integration with QuickBooks, ease of use to help me with budget preparation and the best feature of all is monthly financial reporting. I use Calxa to produce consolidated monthly reports (including Balance sheet) across two separate ledgers for our Board. This has helped me save a lot time in my monthly reporting cycle. It is also configured to produce all my financial reports for all levels of our organisation from Board down to our lower level team leaders. The number of standard reports it has on offer is superior to anything I have used before. What is more amazing is all these incredible features at such an affordable price.

I have discovered that there seems to be no limit in what it can do. The full range of functionality and features has led me to conclude that it is a well established and robust product and Calxa is truly committed to on-going enhancements. I wish I had discovered it earlier.

Calxa is a great tool to have in any accounting team.

Yours faithfully
